AMENDMENT TO THE SPECIFICATION

Please replace the following paragraph on page 42, line 27-page 43, line 12 as follows:

To better understand the remaining process, a brief discussion of CFG engine 212 may be helpful. The operation of CFG engine 212 is described in greater detail in ~~copending U.S. Patent Application serial no. _____~~ US Patent No. 6,957,184 referred to above. Briefly, for the sake of completeness, CFG engine 212 combines all grammars from all applications and RecoContext objects and combines them into a single set of grammars which is communicated to SR engine 206. Therefore, the single SR engine 206 only sees a large collection of words, rules, and transitions which it is to recognize. In maintaining the collection of grammars, CFG engine 212 maintains an indication as to where the grammars came from (i.e., which process they came from).
